Modern cinema and theater business owners and managers have so many different pieces to keep track of running their business, that it is very easy for unseen inefficiencies to lead to potential loss of revenue. Failure to recognize and track trends, uninformed purchasing decisions and unmitigated employee theft can lead to substantial losses. Many business owners fail to recognize these easily avoidable pitfalls. Revel Systems' Point of Sale (POS) tracks and reports on all business activities, including employee tracking, scheduling, payroll, inventory management, and detailed sales reporting. Business owners and managers can keep tight control over their incoming revenues and outgoing costs.

Platform Support

- APPLE iOS

Designed specifically with movie venues and theaters in mind, the Revel Movie Theater POS is the ultimate in quick, convenient and easy to use theater management software. Sell tickets and keep track of movie attendance in accordance with Sony Pictures Compliance. Concession sales are quick and simple, with detailed sales data analytics. With our integrated CRM system, business owners can track loyal customers to cater their services for increased customer satisfaction. Integrated loyalty and gift card programs allow you to attract repeat customers and build your loyalty base. iPad Minis can be used for seat side ordering, creating a custom solution for any business. With a system that is affordable enough for local theaters and venues, and the enterprise reporting capabilities required by multinational cinema chains, Revel Systems has the iPad POS system that can scale with your business.

Supported Hardware

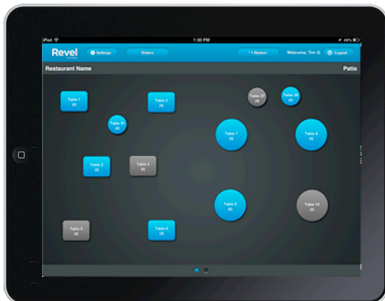

- iPad
- iPad Mini
- iPhone/iPod

Administrators and managers can also set up automatic alerts and reports as well as track trends, inform purchasing decisions, and monitor potential fraud. With included support and software updates, the customer will always have an up to date and fully functional system.
